

THE ALL-NEW, ALL-ELECTRIC BMW iX is our herald of what the future of mobility looks like – and it's here, today. From the very first moment our designer's pencil touched paper to when you take delivery of the BMW iX, we've remained completely committed to our vision of sustainability and emission-free driving pleasure.

The car's elegantly proportioned surfaces and characteristic lines give the BMW iX a magnificent monolithic shape. With each detail meticulously blending into the modern design, it's as if the BMW iX has been created from a single mould.

For the first time, we've incorporated flush handles and frameless doors on a BMW sports-activity vehicle (SAV), further accentuating its pioneering spirit. These design elements aren't just an appealing aesthetic element; they serve an important practical function. By minimising drag on the BMW iX, we've maximised the driving range while also making sure the driver has the most comfortable and peaceful ride possible by reducing road noise.

With a range of up to 630km on a single charge, the BMW iX is equally at ease on the open road and in the modern cityscape. Two powerful electric motors give the BMW iX incredible performance with 385kW of power. The BMW xDrive electric all-wheel drivetrain ensures that this power is smoothly delivered to the wheels, propelling the iX to 100km/h in an astonishing 4,6 seconds. The instant torque and stepless acceleration from a standing start means you can rely on the BMW iX to respond precisely and spontaneously to every movement of the accelerator pedal, delivering a superior driving experience.

DRIVE
TOMORROW, TODAY

'With the BMX iX, we've remained committed to our vision of sustainability.'
